

## RELIGHT S.r.l. ENVIRONMENTAL POLICY

Relight S.r.l., a young and innovative society, is one of the first Italian companies involved in fluorescent lamps collection and recycling, and in electrical and electronic equipments treatment. The environment respect is one of Relight activity main objects. To keep an effective environmental management system Relight assumes the following commitments:

- Respect of all the environmental laws and normatives, considering these as the start point to get further improvements.
- Adoption of all the necessary measures to prevent any kind of environmental impact on the compartments air, water, soil due to its activity.
- Study of any solution to get a continuous improvement of the environmental performances connected to the activity.
- Staff responsabilization thanks to a correct information and training on the environmental aspects of their work.
- Information to our customers and suppliers about our commitment towards the environment, to make them aware of the environmental impact due to the activity carried out for Relight.
- Point out the attention on atmospheric emission reduction due to recyclable products transport, periodically evaluating the market chance.
- Prevention and fast management of any kind of accident, environmental or of other kind, with the help of specific preventive and operative procedures.
- To favor the specific inner communication on the environmental management system.
- To guarantee an external transparent communication on forecasted aims and gained results with the Environmental Performance Statement.
- Introduce and implement the Environmental Management System in Rho (MI) site according to the regulation CE n. 761/2001.

Rho, March 2004
